Alcohol Saliva Test Instructions

Instructions
1. For in vitro use only.
2. Discard after first use. The test strip cannot be used more than once.
3. Do not use the product beyond expiration date.
4. The product is sensitive to the presence of alcohol and moisture. After open the package, the test device should be used immediately.
5. Do not use the kit if the pouch is punctured or not well sealed.

SPECIMEN COLLECTION AND PREPARATION
1. Nothing should be placed into the mouth of the subject for at least 10 minutes prior to saliva collection. This includes food, drink, tobacco products or other materials.
2. Saliva specimen can be collected in a sputum cup or a clean container, or directly applied to the reaction pad of the test strip.
3. Store 2ºC to 30ºC in the sealed pouch up to the expiration date.
4. Keep away from direct sunlight, moisture and heat.
5. DO NOT FREEZE.
6. Preferably open the pouch only shortly before the test

TEST PROCEDURE
1. Remove a strip from the foil pouch by tearing at the notch and place it on a level surface.
2. Saturate the reactive pad by dipping the reaction pad into the saliva specimen collected in a sputum cup, or by applying saliva directly to the reaction pad. After 10 seconds, shake off the excess saliva.
3. Immediately start timer and at 2 minutes, compare the reactive pad with the provided colored chart below.

Blood Alcohol Concentration

<table>
<thead>
<tr>
<th>Blood Alcohol Concentration</th>
<th>Approximate Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.0mg/100ml</td>
<td>0.0%</td>
</tr>
<tr>
<td>20mg/100ml</td>
<td>0.02%</td>
</tr>
<tr>
<td>80mg/100ml</td>
<td>0.08%</td>
</tr>
<tr>
<td>300mg/100ml</td>
<td>0.3%</td>
</tr>
</tbody>
</table>

NOTE: Results after more than 2 minutes may be not accurate
