

EtG/EtS Alcohol Testing

Detects Alcohol in Urine for Up to 80 Hours After Ingestion

PRODUCT FEATURES

- Lab based urine test that detects recent ingestion more accurately and for a longer period of time than standard alcohol tests
- Provides greater sensitivity and accuracy by measuring both EtG/EtS
- Ideal for zero tolerance treatment programs and abstinence enforcement
- Etg/EtS tests may be run conveniently with other drug screens
- Fast results in 3-5 day turnaround from receipt of sample
- Low Laboratory Cut-off level at 100ng/ml
- Rapid, on-site EtG Alcohol test is also available at 300ng/ml & 500ng/ml
